RESULTS OF OPERATIONS FOR THE QUARTER ENDED SEPTEMBER 30, 2022

Investment Income

Investment income increased to \$314.1 million for the three months ended September 30, 2022 from \$269.2 million for the three months ended September 30, 2021 due to an increase in our debt portfolio, dividend income, and rising interest rates. Included in interest income are other fees such as prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns. Period over period, income generated from these fees decreased. Other income decreased period-over-period due to a decrease in incremental fee income, which are fees that are generally available to us as a result of closing investments and generally paid at the time of closing. We expect that investment income will vary based on a variety of factors including the pace of our originations and repayments. Based on current market conditions, we expect repayments, and in turn, originations, to remain modest.

Expenses

Total expenses increased to \$165.7 million for the three months ended September 30, 2022 from \$137.0 million for the three months ended September 30, 2021, primarily due to an increase in interest expense and incentive fees. The increase in interest expense was primarily driven by an increase in the average daily borrowings as well as an increase in the average interest rate. Incentive fees increased primarily due to an increase in our debt investment portfolio and dividend income. As a percentage of total assets, professional fees, directors' fees, and other general and administrative expenses remained relatively consistent period over period.

Liquidity and Capital Resources

As of September 30, 2022, we had \$0.5 billion in cash and restricted cash, \$7.4 billion in

total principal value of debt outstanding, and \$1.7 billion of undrawn capacity on our credit facilities. The Company's weighted average interest rate on debt outstanding was 3.9% and 3.2% for the three months ended September 30, 2022 and June 30, 2022, respectively. Ending net debt to equity was 1.18x and 1.20x as of September 30, 2022 and June 30, 2022, respectively.
