RESULTS OF OPERATIONS FOR THE QUARTER ENDED SEPTEMBER 30, 2023

Investment Income

Investment income increased to \$399.0 million for the three months ended September 30, 2023 from \$314.1 million for the three months ended September 30, 2022, primarily due to an increase in our portfolio's weighted average yield from 10.0% as of September 30, 2022 to 11.8% as of September 30, 2023, partially offset by a decrease in our debt investments portfolio from \$11.7 billion as of September 30, 2022 to \$11.2 billion as of September 30, 2023. Included in investment income is dividend income which includes income earned from our controlled, affiliated and non-controlled, affiliated equity investments. Included in interest income are other fees such as prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns. Period over period, income generated from these fees was relatively consistent. Other income decreased period over period due to a decrease in incremental fee income, which are fees that are generally available as a result of closing investments and normally paid at the time of closing. We expect that investment income will vary based on a variety of factors including the pace of our originations and repayments.

Expenses

Total expenses, excluding taxes, increased to \$206.2 million for the three months ended September 30, 2023 from \$165.7 million for the three months ended September 30, 2022, primarily due to an increase in interest expense and incentive fees. The increase in interest expense was primarily driven by an increase in the average interest rate. As a percentage of total assets, professional fees, directors' fees and other general and administrative expenses remained relatively consistent period over period.

Liquidity and Capital Resources

As of September 30, 2023, we had \$432.0 million in cash and restricted cash, \$7.2 billion in total principal value of debt outstanding, and \$1.4 billion of undrawn capacity on our credit facilities. The Company's weighted average interest rate on debt outstanding was 5.6% and 3.9% for the three months ended September 30, 2023 and September 30, 2022, respectively. Ending net debt to equity was 1.13x and 1.18x as of September 30, 2023 and September 30, 2022, respectively.
