## RESULTS OF OPERATIONS FOR THE QUARTER ENDED MARCH 31, 2023

### *Investment Income*

Investment income increased to \$377.6 million for the three months ended March 31, 2023 from \$350.5 million for the three months ended December 31, 2022 primarily due to an increase in our portfolio's weighted average yield from 11.0% as of December 31, 2022 to 11.5% as of March 31, 2023 while our debt portfolio at par remained relatively consistent at \$11.7 billion from December 31, 2022 to March 31, 2023. Included in investment income is dividend income which increased primarily due to increases in dividends related to Windows Entities, ORCC SLF, Wingspire and Swipe Acquisition Corporate (dba PLI). Also included in interest income are other fees such as prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns. Period over period, income generated from these fees increased. Other income decreased due to a decrease in incremental fee income, which are fees that are generally available as a result of closing investments and normally paid at the time of closing. We expect that investment income will vary based on a variety of factors including the pace of our originations and repayments.

### *Expenses*

Total expenses increased to \$196.4 million for the three months ended March 31, 2023 from \$188.0 million for the three months ended December 31, 2022, primarily due to an increase in interest expense. The increase in interest expense was primarily driven by an increase in the average daily borrowings as well as an increase in the average interest rate. As a percentage of total assets, professional fees, directors' fees, and other general and administrative expenses remained relatively consistent period over period.

### *Liquidity and Capital Resources*

As of March 31, 2023, we had \$399.5 million in cash and restricted cash, \$7.5 billion in total principal value of debt outstanding, and \$1.3 billion of undrawn capacity on our credit facilities. The Company's weighted average interest rate on debt outstanding was 5.2% and 4.7% for the three months ended March 31, 2023 and December 31, 2022, respectively. Ending net debt to equity was 1.21x and 1.19x as of March 31, 2023 and December 31, 2022, respectively.
